

Certified Radiology Administrator

Validating Knowledge in Imaging Administration

When it comes to finding qualified talent to lead medical imaging, **CRA-credentialed professionals provide the competitive advantage.**

CRA Knowledge Areas

The Certified Radiology Administrator (CRA) credential is an exam-based certification tailored specifically to medical imaging administration. A CRA is a professional with tested, proven knowledge and excellence in:

- Human resource management
- Asset resource management
- Fiscal management
- Operations management
- Communication and information management

Those who earn the CRA credential have the **specific knowledge and skills necessary to lead the imaging team and manage the wide range of tasks involved in imaging management.**

CRA Adds Value

- Validated high-level **management competency**
- Advanced understanding of the **principles** of the imaging business
- Demonstrated ability in **applying knowledge and leadership to guide and develop** imaging management teams
- Certified, proven high standards of **achievement and ethics**

The CRA **raises the standard for healthcare organizations and patients**, assuring employees, practitioners and patients that **the organization and the individual is committed to providing excellent care and exceeding community standards.**

CRA Requirements

- Candidates must meet professional **experience and education** requirements.
- Candidates must pass a challenging examination that tests the skill sets crucial to **quality imaging management.**
- The CRA credential must be **renewed every 3 years** and requires a minimum of 36 contact hours of continuing education studies in the 5 domains tested on the CRA examination.

CRA certified individuals: the *right* talent for imaging management
